

Se possiedi un anello di riferimento tipo "fede"

1) Stampa questo documento su un foglio di carta A4 facendo attenzione che non sia attiva l'opzione "adatta alla pagina". Per essere sicuro controlla con un righello che la scala riportata al piede sia effettivamente 10 cm di lunghezza.

2) Appoggia un anello che già indossi sul foglio stampato (l'ideale sarebbe un semplice anello tipo "fede") e verifica a quale misura dei cerchi grigi sottostanti corrisponde (**attenzione:** per una buona misurazione il contorno nero dovrà essere visibile senza spazi bianchi all'esterno). Quella sarà la taglia che dovrai ordinare riportando il numero nell'apposita casella sul buono d'ordine.

N.B.: Gli anelli SKEW, in quanto anelli "a fascia" seguono una numerazione differente rispetto alle misurazioni standard (la cosiddetta taglia "plus" indicata dal segno "+" che trovate all'interno dell'anello) al fine di migliorarne la portabilità.

Using a "wedding band" style ring

1) Print this document onto a sheet of A4 paper, check that the page sizing on your printer is not set to "fit to page". To be sure you have printed correctly, measure, using the scale at the bottom of the page: your template must be exactly 10 cm in length.

2) Place a ring that you already wear (ideally it should be a "band" ring) on the template and verify the correct size using the grey circles. Ensure that there is no white present between the black border and the ring. The number corresponding to the chosen template is the size required when placing your order.

N.B.: The band style Skew rings use a different sizing guide to standard sizing, (as seen in the "plus" size, indicated with the symbol '+' on the inside of the ring) to give better wearability.
